PROJECTS

ONLINE SHOPPING APPLICATION

09/2023 - 10/2023

<https://github.com/dabhishek2810/OnlineShoppingApplication.git>

- Online e-cart using Eclipse, Java, HTML, CSS, Bootstrap, and Oracle SQL, following MVC architecture with the controller, dao, service, and entity sections.
- Enabled OTP-based user verification and admin access, ensuring data integrity.
- Managed 3 distinct modules - customer, admin, register - with a sequential request flow from controller to database via service and dao layers.
- Orchestrated a clear request path from the user interface to the database entity, showcasing seamless connectivity.
- Overcame hurdles to ensure smooth data interactions, precise modification, and addition of products within the e-cart system.
- Addressed challenges, ensuring smooth product modification and addition, resulting in an optimal user experience.

STUDENT MANAGEMENT SYSTEM

10/2023 - Present

<https://github.com/dabhishek2810/Student-Management-System.git>

- Created a Student Management System using Java, Spring (JDBC, MVC, Security), HTML, CSS, Bootstrap, and Oracle SQL, ensuring efficient data handling.
- Utilized Spring Security to provide a secure user access system, ensuring data integrity and confidentiality.
- Employed a comprehensive MVC structure with six sections-controller, dao, service, entity, rowmapper, and repository -streamlining data flow and storage.
- Orchestrated a seamless data flow from controller to repository, enabling robust connectivity with the database for precise and secure student data management.
- Ensured precise student data management, addressing nuances in data storage and manipulation for a streamlined experience.
